# Timepeel Microdermabrasion Home System

## What is the Timepeel Microdermabrasion Home System?

Well, you have probably heard all about microdermabrasion. Home microdermabrasion has become something of a hot topic recently. Why? Because at home systems give you all the benefits of this skin rejuvenating treatment without having to pay over and over again to have this treatment done every few months?

**Timepeel** is a microdermabrasion technique that uses diamonds to exfoliate and resurface your skin. Your skin takes a lot of wear and tear every day. Everything, from pollution, to the foods you eat, to the amount of direct sunlight you are exposed to, can have an effect on how your skin looks. And, over time, all of this begins to show.

Fortunately, your body has a natural process in place to help deal with this situation. Your skin cells go through a cycle. As they become damaged and dull, they are replaced by new, healthier skin cells. Unfortunately, this rejuvenation process begins to slow down as we get older. And, as the rejuvenation process begins to slow down, our skin begins to visibly age.

Regular exfoliation treatments helps get this process up and running again. Not only does exfoliating help speed up the production of new, healthy skin cells, it also helps to remove the dull, dead skin cells that would otherwise cover them up.

**MyTimepeel** is a microdermabrasion home treatment that uses diamonds (which are a lot better on your skin than some of the things used by other microdermabrasion techniques). Timepeel removed the damaged top layer of your skin, which can drastically decrease the visible signs of aging, including:

- fine lines and wrinkles
- age spots
- blemishes and skin discolorations
- some acne scars

Many people compare microdermabrasion to turning back the hands of time to help make you look years younger. And, with the [Timepeel microdermabrasion home treatment system](#), you can do it all comfortably and conveniently in your own home. JG8D69D
